

Invisible deck rules

To predict your card, you need to calculate the associated card.

For example, if you should predict six of ♥ you should find seven of ♠ because the sum of the card values are 13 and ♥ ♠ are associated.

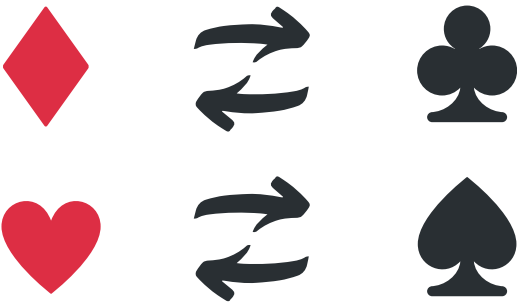

6 ♥ + 7 ♠ = 13

Values

11 / 12 / 13 / 1

Associated to

Exceptions

Pair

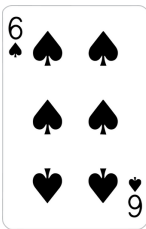

Odd

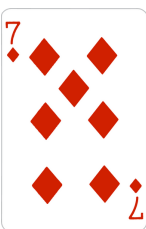

Examples

Pair

6 + 7

Odd

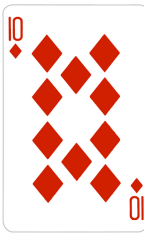

= 13

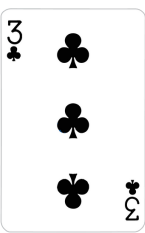

1 + 11

= 13

10 + 3

= 13
